PREFACE

The contingent of scientific and technical manpower has grown considerably over the years. The activities over which S&T manpower is engaged have also multiplied. Many IITs, other Institutions of National Importance and S&T Departments in universities have started functioning. Science, Engineering and Technology departments in universities and institutions of higher education including post-graduate colleges are inter alia concerned with research in science and technology. With the growing inclination towards such R & D work in Universities/Institutions, the number of projects, amount involved and manpower engaged rose considerably. Not much has been done in the area of quantifying the R & D effort of the scientific and technical manpower in universities and institutions of higher education.

It goes to the credit of Department of Science and Technology that they have been providing leadership and financial support for research into utilisation pattern of the scientific and technical manpower. The present study namely 'Quantification of Involvement of S&T Faculty of Universities and Colleges in R&D activities' has been undertaken by the Institute of Applied Manpower Research at the instance of and with the financial support of the Department of Science and Technology.

The Report is in two volumes. Volume I contains the text of the Report and Volume II is a Directory of Experts by area of specialisation.

It is earnestly hoped that the findings and recommendations made in this study report would be useful to policy planners, educational institutions, research financing bodies, faculty members in S&T disciplines and researchers in the area of S&T manpower. The Directory of Experts may be useful to the Department of Science and Technology, University Grants Commission, Council of Scientific & Industrial Research and other concerned organisations for referral purposes.

The Institute is grateful to the members of the Advisory Committee for having provided valuable guidance and support to the study at various stages. Late Professor Gautam Mathur, former Director, IAMR, Dr. (Mrs.) A.R. Rajeswari, Joint Adviser, DST, Dr. D.N. Mishra, Director General & Adviser, M.P. Council of S&T Bhopal, Dr. (Mrs.) M. Chandra, Professor, NCERT, Shri J.P. Vinayak, Coordinator, University Grants Commission, Commodore R. Chandra, former Professor & Head of Training and Placement, IIT, Delhi deserve special mention. We are thankful to various universities and institutions as also to the faculty member for furnishing the requisite data and extending desired cooperation. Our thanks are also due to late Shri R.R. Gulati, Principal Scientific Officer and Dr. G.J. Samathanam and Shri Rakesh Chetal, Senior

Scientific Officers at DST who had been coordinating with this Institute on behalf of the Department of Science & Technology.

We thank the Department of Science and Technology for sponsoring and financing this study.

INTRODUCTION TO VOLUME - II

The Volume-II of the report is the Directory of Experts (faculty members who furnished the data for the study) by their areas of specialisation. The Directory contains information on designation, addresses and field of specialisation about the experts. The areas of specialisation of the experts have been categorised under the basic disciplines like Physics, Chemistry, Biology etc; which appear in the alphabetical order in this Directory. All the members of core staff mentioned on prepage have contributed in preparation of this Directory but the maximum compilation work has been done by Shri G.P. Joshi, Mrs. H.S. Leena Rai and Shri Bhoop Singh, Research Associates.

It is earnestly hoped that this Directory will be useful to the Department of Science & Technology, University Grants Commission, Council of Scientific and Industrial Research and other concerned Organisations for referral purposes.
