

Executive Summary

- The directory contains the list of experts of Mathematical Sciences i.e. Mathematics and Statistics.
- The number of departments offering course in Mathematics and Statistics are 141 and 101, respectively.
- There are total 660 experts out of these 379 are from Mathematics and 281 from Statistics.
- The directory provides the information about Name, Organisation, Sex, DOB, Ph.No., Contact Address, Teaching and Research Experience, Area of interest, Ph.D. produced and Paper Published of every expert.
- This directory also gives Statewise-Universitywise-Alphabetical Names as well as experts alphabetical index at the end.
- There are total 415 experts of Mathematics and Statistics having more than 20 years teaching experience.
- The most preferred area of research by the mathematicians is Fluid Dynamics and followed by Functional Analysis.
- The most preferred area of research by the Statisticians is Operations Research and followed by Statistical Inference.
- Real Analysis is least preferred area of research by mathematicians. Similarly, Multivariate Analysis is the least preferred area of research by Statisticians.
- The researchers of Mathematics and Statistics, who have undertaken project are 40 and 45 respectively.
- Total 218 experts have written books in Mathematical Sciences, out of these, 142 are in Mathematics and 76 in Statistics.
- At the end, a list of Universities, who have responded and provided information to us are given.
