	Executive Summary
	List of Abbreviations
	List of Tables
	List of Figures
Chapter	I	Introduction
	1.1	Importance of studies on career and career distribution
	1.2	The human dimension in career development
	1.3	Goals of engineering education
	1.4	Earlier studies in India on career patterns of engineering graduates
	1.5	The Indian scenario
	1.6	The personal/behavioural dimension
	1.7	The objectives of the present study
Chapter	II	Methodology
	2.1	Introduction
	2.2	Address collection
	2.3	Preparation of questionnaire and data collection
	2.4	Summary statistics
	2.5	Data processing and analysis
	2.6	Methodology for creating the information system

	2.7	Steps in developing the information system for alumni in India
	2.8	Steps in developing the Information System for alumni abroad
	2.9	Choice of a DBMS
Chapter	III	Results
	3.1	Introduction
	3.1.1	Estimates of Brain-Drain of IIT Kharagpur graduates
	3.1.2	Estimates of Brain-Drain of graduates of other IITs
	3.1.3	Actual Brain-Drain may be on the lower side
	3.2	Analysis of the questionnaire responses
	3.2.1	Career profile and current job content
	3.2.2	Migration of careers
	3.2.3	IIT education
	3.2.4	Background
	3.2.5	On entrepreneurship
	3.2.6	Job satisfaction
	3.2.7	Levels of self esteem
	3.2.8	Locus of control
	3.2.9	Career planning
	3.3	Analyses of Interrelationships between different educational, socio-economic, personal and behavioural factors and career related variables in respect of alumni in India and alumni abroad
	3.3.1	Relationships between 'position in the class' and career related variables

3.3.2	Relationship between the group which got their subject of choice/did not get the subject of their choice during Joint Admission to IIT, with other variables
3.3.3	Relationship between a group which studied a subject chosen out of innate interest/a subject chosen because of external pressure and the career related variables
3.3.4	Relationship between residential background and career related variables
3.3.5	Relationship between father's educational level and career related variables
3.3.6	Relationship of mother's educational level and career related variables
3.3.7	Relationship between family income level and career related variables
3.3.8	Relationship between school background and other variables
3.3.9	Relationship between state of domicile and career related variables
3.3.10	Relationship between fathers occupation and other career related variables
3.3.11	Relationship between perceived job satisfaction and career related variables
3.3.12	Relationship between self esteem and career related variables
3.3.13	Relationship between locus of control and the career related variables

Chapter	IV	Some Views
	4.1	Viewpoints from pilot studies
		4.1.1 Opinionnaire survey
		4.1.2 Questionnaire in "Science Reporter"
		4.1.3 Study on a sample of final year students
		4.1.4 Pilot study on first year students
	4.2	Viewpoints of the target group alumni regarding career migration
		4.2.1 Steps suggested to discourage IIT engineers from taking up non-engineering careers
		4.2.2 Reasons for not considering it a waste if IIT engineers take up non-engineering careers
Chapter	V	Concluding Remarks
	5.1	Summary
	5.2	Some Remarks
	5.3	Recommendations
		5.3.1 Policy level recommendations
		5.3.2 Industry level recommendations
		5.3.3 Institution level recommendations
	5.4	Limitations of the study
	5.5	Scope for further study
		Bibliography & References
Appendix	I	Questionnaire for alumni in India
Appendix	II	Questionnaire for alumni abroad
Appendix	III	List of PAC Members
