------------------------	----

#### **List Of Exhibits**

##### **Chapter 1 :-**

Figure-1: Expenditure of time-resources by biochemists on manpower generation	12
Figure-2: Expenditure of time-resources by biochemists on manpower generation	13
Figure-3: Perceptions regarding current incentive-system inside organization in Kolkata city	14
Figure-4: Immunologists' Perceptions regarding current incentive-system inside Organization	15
Figure-5: Strength of Indian research groups	16
Figure-6: Weakness in domestic professional public domain	17
Figure-7: Organizations granted more than 100 patents in India	18
Figure-8: US patents granted to Indian authors from various cities	19

##### **Chapter 2 :-**

Figure-1: Distribution of respondents over major cities	23
Figure-2: Distribution of respondents over major institutions	24
Figure-3: Geography of postgraduate study of respondents	26
Figure-4: Geography of doctoral research-study of respondents	27
Figure-5: Geography of postdoctoral research-study of respondents	28
Figure-6: Dynamics in expertise of respondents	30
Figure-7: Career and expertise mobility of respondents	31
Figure-8: Importance of reputation of alma mater in deciding manpower quality	33
Figure-9: Importance of reputation of guide/teacher in deciding manpower quality	34
Figure-10: Importance of research publication/output in deciding manpower quality	35
Figure-11: Importance of originality and understanding in deciding manpower quality	36
Figure-12: Importance of problem-solving skill & business orientation in deciding manpower quality	37
Figure-13: Importance of capability in interdisciplinary research/teaching in deciding manpower quality	38
Figure-14: Number of students trained at M.Tech/M.Phil levels	40
Figure-15: Number of students continuing higher studies following M.Tech/M.Phil	41
Figure-16: Number of students that went abroad for doctoral and other higher studies	42
Figure-17: Number of students entering job market following M.Tech/M.Phil levels	43
Figure-18: Public space: Knowledge about excellent teachers in the country for own area	45
Figure-19: Public space: Knowledge about excellent researchers in the country for own area	46
Figure-20: Public space: Knowledge about good & productive researchers in the country for own area	47
Figure-21: Public space: Knowledge about doctorates earned in the country for own area	48
Figure-22: Public space: Knowledge about excellent research papers from the country for own area	49
Figure-23: Public space: Knowledge about promising research groups in the country for own area	50
Figure-24: Public space: Knowledge about New & challenging research projects in the country for own area	51
Figure-25: Undertaking research sponsored by national agencies	53
Figure-26: Undertaking research sponsored by industry	54
Figure-27: Undertaking team-based research with members from national organizations	55
Figure-28: Respondent as lone researcher	57
Figure-29: Respondent undertaking contract research	58

Figure-30: Respondent undertaking sponsored research	59
Figure-31: Respondent undertaking collaborative research	60
Figure-32: Whether critical numbers of researchers are necessary for a sub-field	62
Figure-33: Quantity of critical numbers of researchers-generation necessary for a sub-field	63
Figure-34: Social diffusion – collaboration with professionals from small town	65
Figure-35: Social diffusion – elevating teaching & curricula at small towns	66
Figure-36: Publication in international journal by author alone	68
Figure-37: Publication in national journal by author alone	69
Figure-38: Designing alone novel experiments/research/software	70
Figure-39: Designing or offering with others novel teaching courses/lecture notes	71
Figure-40: Developing alone new materials/entities/prototypes/algorithms	72
Figure-41: Reviewing international research projects at the pre-grant stage	74
Figure-42: Reviewing national research projects at the pre-grant stage	75
Figure-43: Reviewing international journal papers before publication	76
Figure-44: Reviewing national journal papers before publication	77
<b>Chapter 3 :-</b>	
Figure-1: Distribution of data over cities and towns	80
Figure-2: Distribution of data over S&T organizations major and minor	81
Figure-3: Manpower with doctorates earned from 'major' organizations	83
Figure-4: Manpower with post-doctorates done from organizations abroad	84
Figure-5: Doctoral students trained	86
Figure-6: Co-authored papers in international journals	88
<b>Chapter 4:-</b>	
Figure-1: Distribution of biotechnology firms across sectors in Hyderabad	91
Figure-2: Turnover of biotechnology firms in Hyderabad across industrial sectors	92
Figure-3: Size distribution of biotechnology firms at Hyderabad according to number of employees	94
Figure-4: Size distribution of biotechnology firms at Hyderabad according to number of technical employees	95
Figure-5: Distribution of biotechnology firms at Hyderabad according to the ratio between technical and total employees	96
Figure-6: Distribution of biotechnology firms at Mumbai according to ownership	98
Figure-7: Distribution of biotechnology firms at Bangalore according to ownership	99
<b>Chapter 5:-</b>	
Figure-1: Distribution of output, authors and journals in few areas of chemistry	101
Figure-2: Impact Factor of most popular journals	103
Figure-3: Impact Factor of less popular journals	104
Figure-4: Impact Factor of even less popular journals	105
Figure-5: Impact Factor of least popular journals	106
Figure-6: Year-wise distribution of IF of journals publishing only one paper	108
Figure-7: Year-wise distribution of IF of journals publishing only ten papers	109
Figure-8: Year-wise distribution of IF of journals publishing papers between 51-100	110
Figure-9: Quality and quantity of manpower in organic chemistry	112
Figure-10: Quality and quantity of manpower in protein crystallography	113
Figure-11: Quality and quantity of manpower in nucleic acid	114
Figure-12: Quality and quantity of manpower in proteomics	115
Figure-13: Annual changes in number of authors and research papers in chemical biology	117
Figure-14: Annual changes in number of authors and research papers in medicinal science	118
Figure-15: Annual changes in number of authors and research papers in biopolymer	119
Figure-16: Annual changes in number of authors and research papers in chemistry	120
Figure-17: City wise distribution of gross-quality, total manpower and total output in select areas of drugs & pharmaceuticals	122
Figure-18: Assessing quality of active organizations through cumulative distribution of	

productivity in research papers	124
Figure-19: Annual distribution of research productivity indicating quality-trend in areas of chemicals related to life sciences	126
<b>Chapter 6:-</b>	
Figure-1: Yearly distribution of US patents granted to inventor's country India in hydrocarbon area	129
Figure-2: Yearly distribution of US patents granted to inventor's country India in polymer area	130
Figure-3: Patents granted to inventors from India for the area cancer	132
Figure-4: US patents granted to the CSIR under several areas and the number of authors	134
Figure-5: Distribution of US patents-granted applicants over cities of India	136
Figure-6: Numbers of authors and patents from Hyderabad in several areas of patents granted by the US	138
<b>Chapter 7:-</b>	
Figure-1: Distribution of medical related research output from different types of research/academic organizations	141
Figure-2: Distribution of research output over cities of India in the areas related to medical and drugs & pharmaceuticals	143
Figure-3: Distribution of research capability as reflected in output over metro cities	145
Figure-4: Distribution of research capability as reflected in output over non-metro cities	146
Figure-5: Distribution of output over organizations in Hyderabad	148
Figure-6: Research output growth from medical establishments	150
Figure-7: Research output distribution over university system	151
<b>Chapter 1: Introduction</b>	1
<b>Chapter 2: States of affairs</b>	21
<b>Chapter 3: Analysis on data from public websites</b>	78
<b>Chapter 4: Biotechnology firms and manpower</b>	89
<b>Chapter 5: Quality of manpower and research in chemical and areas related to drugs and pharmaceuticals</b>	100
<b>Chapter 6: Patenting activity from India</b>	127
<b>Chapter 7: Quality, output and distribution of research outputs in drugs &amp; pharmaceuticals related areas</b>	139
	Volume – II
<b>Chapter 8: Training and degree education capacity</b>	152
<b>Part I Database-I</b>	
	Volume – III
<b>Part II Database II</b>	
<b>Appendix : Survey Questionnaire</b>
